Part# APS2G

American Glass Research

A division of Agr International, Inc.

TEST DATA

AGR Reference Number: C703-08

On November 20, 2008 we received samples of your stainless steel lined airpots. American Glass Research was requested to evaluate and perform heat testing.

The results of the heat retention testing for the 2.0 liter stainless steel liners indicated that the water temperature inside the airpot averaged a 22.07°F drop over a 6.5 hour monitoring period.
